## Hooka - Lift & Carry Crawler Specification Sheet

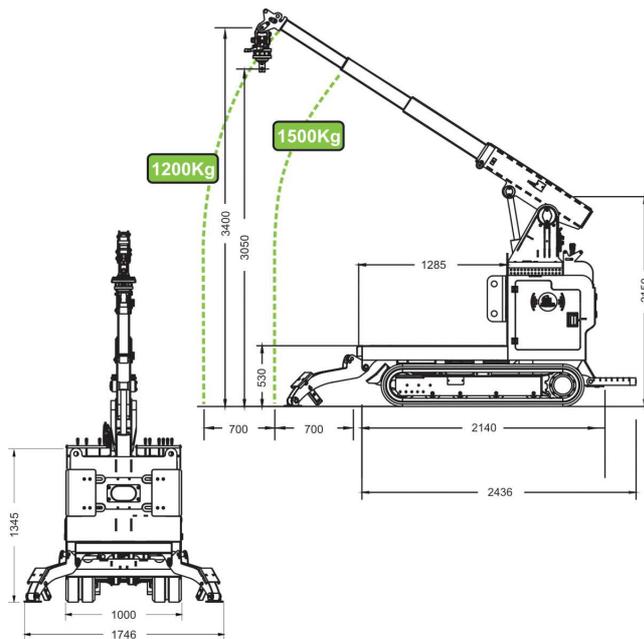

Kerb weight (empty): 1800Kg

Max lift / carry capacity: 1500Kg (see load rating chart below)

**Note:** Extra reach + height available using optional Fly-jib attachment

Max gross weight: 3300Kg

Honda powerplant - emissions compliant

Track length (Ground contact): 1450mm

Overall width (tracking mode): 1000mm

Machine footprint: 1.45m<sup>2</sup>

### Ground Loading :

Kerb weight (empty): 1241Kg/m<sup>2</sup>

With max load: 2275Kg/m<sup>2</sup>

**Note:** As the Hooka runs on tracks its 'point loading' pressure is already very low. However, the overall ground loading (Kg/m<sup>2</sup>) of the machine can easily be reduced even further by running the machine on top of standard 'trackway' materials to spread the load over a wider area.
